Institutional Review Board (IRB)

Research Committee

The Research Committee is headed by the Principal, faculty with doctoral degree to promote and monitor the research activities and advocates high standard of responsibility for ethical conduct from the faculty engaged in research, in all aspects of their research activity.

Objectives

- Promote and coordinate multidisciplinary research in the college.
- Encourage faculty to engage in research in their respective fields, and thereby enable an efficient exchange of knowledge and ideas with the student community
- Spread awareness on the importance of ethical practices and considerations in research
- Encourage and support student-centric research projects
- Motivate and conduct workshops on research methodology for students and faculty
- Paper presentations in college by students to disseminate the research findings
- Create an environment in the campus to promote collaborative research among faculty and students from various departments
- Create an academic culture and multidisciplinary research projects that follows sustainable research works
- Create awareness among students and members of the faculty about conducting research that is original and authentic.

Functions of Research Committee

The research committee in a nursing college plays a crucial role in promoting and supporting research activities within the institution.

Planning and Coordination: The research committee is responsible for planning and coordinating research activities within the nursing college. This includes identifying research priorities, setting goals and objectives, and developing a research agenda.

Promoting Research Culture: The committee plays a vital role in creating a research-oriented culture within the nursing college. It organizes seminars, workshops, and conferences to encourage faculty members and students to engage in research. It also promotes the dissemination of research findings through publications and presentations.

Ethical Review: The research committee oversees the ethical review process for all research projects conducted within the nursing college. It ensures that research protocols adhere to ethical guidelines and regulatory requirements.

Research Support and Resources: The committee provides support and resources to researchers within the nursing college. This may include access to research facilities,

equipment, databases, and libraries. The committee may also offer assistance in research design, data analysis, and statistical support.

Collaboration and Networking: The research committee fosters collaboration and networking among researchers within the nursing college as well as with external partners. It facilitates interdisciplinary research collaborations, encourages partnerships with other institutions, and promotes collaboration with healthcare organizations and community stakeholders.

Research Evaluation and Quality Assurance: The committee monitors the quality of research conducted within the nursing college. It evaluates research proposals and projects, ensures compliance with research standards, and promotes the use of appropriate research methodologies.

Research Dissemination: The committee supports the dissemination of research findings to a wider audience. It encourages researchers to publish their work in reputable journals, present at conferences, and share knowledge within the nursing community through various platforms.

Research Training and Education: The committee may organize research training programs and workshops to enhance the research skills of faculty members and students. It promotes evidence-based practice and encourages the integration of research findings into nursing education and clinical practice.

Monitoring Research Outcomes: The research committee tracks and monitors the outcomes and impact of research conducted within the nursing college. It assesses the contribution of research to knowledge advancement, patient care, and the overall development of nursing practice.

Overall, the research committee in a nursing college plays a pivotal role in fostering a research culture, supporting research activities, and ensuring the quality and ethical conduct of research within the institution.
